

ROUNDTABLE
ON
SUSTAINABLE
BIOMATERIALS

info@rsb.org - www.rsb.org

“With tools like RSB, we can tackle climate change and create prosperity for people and nature. It can act as an inspiration to government policymakers as well as industry.”

Achim Steiner, Executive Director,
United Nations Environment Programme

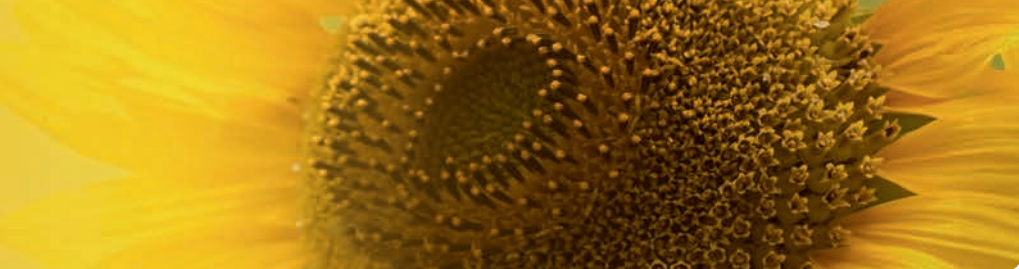

A Sustainable Bioeconomy

RSB is an independent and global multistakeholder coalition which works to promote the sustainability of biomaterials.

Originally established in 2007 to ensure the sustainability of biofuels, RSB expanded in 2013 to cover biomaterials and now offers the most comprehensive system for certifying bio-based feedstock.

Choosing RSB-certified biomaterials helps build trust and credibility in the bioeconomy and supports a healthy bio-based community.

“For us, sustainability is not a nice-to-have, it’s a prerequisite for doing business. To ensure we can supply sustainable fuel to any airline, at any airport in the world, we need one global sustainability certification scheme that we can trust. For us, RSB is this scheme.”

Maarten van Dijk, Chief Executive Officer, SkyNRG

Changing the World... One Certification at a Time

RSB certification is recognised by WWF, IUCN and the Natural Resources Defense Council as the strongest and most trusted of its kind. The certification scheme is approved by RSB’s members, including leading NGOs and UN agencies.

Certification is based on the three pillars of sustainability:

Social

In areas of poverty, RSB ensures that the production of biomaterials enhances food security and local livelihoods.

Environmental

Certification mandates biodiversity preservation, as well as best practices in land and water management.

Economic

RSB works with the private sector and its multistakeholder members to make sure that sustainability requirements remain efficient and practical to implement.

Join RSB

Membership is open to any organisation or individual working in a field relevant to the sustainability of biomaterials.

RSB membership allows you to join a rapidly-growing and diverse network of companies and non-profit organisations. RSB standards are updated regularly and members take an active role in the development process.

Other benefits include:

- **20% discount** on licensing fees for RSB certification
- **Updates on the latest developments** in policy and industry
- **Participate** in the governance of RSB

About RSB

Roundtable on Sustainable Biomaterials (RSB) is a global movement to ensure the sustainability of biomaterials production through a comprehensive certification system. RSB brings together over 100 organisations around the world including farmers, businesses, NGOs, governments and UN agencies.
